

## **Engineering Partner for Cabin Conversions**

Equipment • Electrics • Mechanical • Structure • Systems

### **Your experienced engineering partner**

QRelation Engineering is a team of highly qualified technical experts in the areas of equipment, electrics, mechanical, structure, and systems.

### **Our competence for your Cabin**

From development to integration on the aircraft; including supplier management and project management – you will have only one point of contact to receive your ‘turnkey’ engineering solution.

# Modification/Conversion and Engineering of Small or Large Projects

We are specialists in providing engineering support in the field of aircraft cabin with skilled resources. The basis are many years of engineering experience and numerous successful projects for major OEMs and MROs.

## We understand your challenges:

With many years of experience we guarantee an easy, fast and cost-conscious handling of your projects.

## Fast and flexible use

### of our development resources:

Benefit from reliable contacts.

Our team is leading your project and will add the necessary resources quickly and flexible from our partner network.

## A large network for focused project teams:

All employees of the QRelation Engineering Team GmbH are excellent connected in the engineering market.

The knowledge and network of the parent company is also available to you!

This combination gives you access to project management and the certification of our solutions, besides the necessary technical expertise.

## Optimal service models:

We are locally available (or at the MRO facility) – even for short-term bottleneck in capacity – or in-house at our company, according to your needs.

- Work Packages (fixed price)
- Service Contract (per day)
- Temporary Work in your organisation (time and material)

## Engineering Services:

From minor changes to full cabin conversions – QRelation Engineering offers the following:

- Cost Estimation on the Aircraft (Initial Survey)
- Preparation of Specifications
- Feasibility Studies, Installation and Assembly Studies
- Industrial Design
- Calculation and Design of Cabin Components and Systems
- System Integration
- Technical Documentation
- Project and Supplier Management
- Qualification/Certification
- Non Conformity Management
- Layover Support
